BODGER'S

Unrivalled Flower Seeds

We take pleasure in presenting to our customers this season an extensive price list, covering Flower Seeds for florist and general use.

All of the old favorites are included, as well as novelties, and this year we have added various sorts of Flower Seeds not previously grown in the United States, to accommodate those of our customers who wish to entrust us with a general order.

"GROWING OUR OWN"

It is our policy to grow our own FLOWER SEEDS, personally, on our own land. We are nearer to the complete realization of this ideal today than we have ever been before. Besides our large acreage at El Monte, we have established a growing station at Lompoc, California, where we grow Sweet Peas and many spring annuals which thrive in that locality.

The advantage of this concentration of effort and consequent elimination of conflicting standards is incalculable. To this policy of "Growing Our Own," we lay our reputation for reliability, and such distinction as we have gained in the field of floriculture.

OUR GOLD MEDAL DAHLIA FLOWERED ZINNIAS

The Royal Horticultural Society of England recognized our DAHLIA FLOWERED ZINNIA as a distinct advance in flower culture, by the granting of an "Award of Merit" for the strain and a Gold Medal for the group exhibited in the London Show in July, 1924. This recognition came as a culmination of ten years of effort to improve and popularize the Zinnia.

We take this opportunity to thank our many friends for their liberal patronage during the past season. We earnestly hope that the quality of our seed and the prompt SERVICE which we are endeavoring to extend to all will warrant a continuance of this support.

— A Generation of Service —

ASTERS

We have under cultivation a large tract of land of an alluvial and peat composition which is sub-irrigated from mountain springs.

In this soil, we are able to grow Asters with a minimum of trouble from the diseases common to this plant. Usually there is no rain in Southern California from planting time until harvest. Seed grown under these conditions is of high vitality.

Conditions are thus ideal for us to carry out our program of rigid roguing. Our care in reselection has enabled us to improve old varieties and to establish new types.

NEW ASTERS OF OUR OWN PRODUCTION

We have noted with pleasure the steadily increasing popularity of the Beauty Aster as a florist's flower. The colors are good, and their keeping qualities unsurpassed. They are excellent shippers.

LATE BEAUTY TYPE

Plants about 2 to 3 feet high, of branching habit, commencing to bloom in early September and lasting until destroyed by frost. Flowers large, borne on long and stout stems, from 18 to 24 inches. This applies to all of the Beauty Class, making them most desirable for cut flowers.

	Per oz.	Per ¼ lb.	Per lb.
-----Azure Fairy, azure blue or dark lavender-----	.75	2.50	8.00
-----Carmine Rose (original Beauty introduced)-----	.75	2.50	8.00
-----Crimson-----	.75	2.50	8.00
-----Lavender, light grayish lavender, (not a florist's color)-----	.75	2.50	8.00
-----Peach Blossom, very desirable-----	.75	2.50	8.00
-----Purple-----	.75	2.50	8.00
-----Rose, pleasing bright rose-----	.75	2.50	8.00

-----White Beauty, Giant white-----	.75	2.50	8.00
-----Finest Mixed-----	.75	2.50	8.00

EARLY BEAUTY TYPE

This type has all of the characteristics of the Late Beauty Type, and is valuable for locations where the season is too late to flower the late type before frost, and for early forcing.

We wish to emphasize, however, that this is not an Early Aster as compared with Early Express or Queen of the Market, but earlier than the

ASTERS—Early Beauty Type—Continued

Late Beauty Type which is the latest of all Asters. Planted at the same time this type flowers with the Crego and American Branching. Please note we have added three colors to this type.

	Per oz.	Per ¼ lb.	Per lb.

GIANTS OF CALIFORNIA

A Novelty of Merit

We take pleasure in recommending this type as the best Aster on the market today. Characterized by the well-known Crego or Ostrich Feather type of flower, combined with the Beauty Aster's long, non-lateral branching stems and sturdy habit of growth, the California Giant Double type of Aster stands at the head of the list, not only for florists' use, but also for private gardens where quality is appreciated. Careful selection has not only perfected this type but has enabled us to extend the color range. The White is exceptionally large and distinctive. Peach Blossom opens as a white and darkens as it ages, so that it covers a large range of colors. Light Blue is an exceptionally fine florists' flower; the color, although delicate, has a sufficient degree of intensity to please the most critical eye. Rose is a very rich deep shade, similar to Aster Beauty Bright Rose. The favored florists' colors are thus fully represented.

We believe the California Giant Double type of Aster will this year take its deserved place as the best Aster for florists' and for general use.

Single Type

Single Giants of California

We are offering this wonderful Aster for the first time this year. It was developed out of the Double Giants of California type. The flowers are large, measuring three to four inches across, with stems 18 to 24 inches in length. The petal has a slight twist, which adds a piquant touch to its beauty. The white blossoms resemble Shasta Daisies in appearance, but their greater length of stem makes them more graceful and better adapted to florists' use. In the garden, the Single Giants of California add a charming note of simplicity among the fuller types of Asters. We believe this new, single type of Aster is destined to become very popular.

 We grow, on our own farms, more than two hundred acres of Asters under our own supervision.

Our business is growing—but “growing” is our business.

May we not grow for you?

ZINNIAS

BODGER'S GOLD MEDAL DAHLIA FLOWERED

In July, 1924, the Royal Horticultural Society of England granted an "Award of Merit" for the strain, and a **Gold Medal** for the group of Dahlia Flowered Zinnias exhibited in the London Show. This official recognition of the strain meant much to its originator, our late president, John Bodger, who had put forth the best efforts of his last years in perfecting this type.

The large size, fullness of petals, extraordinary color range, and good keeping qualities of this flower have all contributed to its popularity. It is easily grown, and keeps well when cut. It is at present immune from disease. Equally good as a garden flower and as a florist's specialty, its popularity should increase with years. It has been truthfully called "A NEW FLOWER FOR THE PEOPLE."

A Florist's Moneymaker

This type is proving a good forcer among the florists. Polar Bear is forced and used extensively as a bunching flower for Mother's Day, while Exquisite, Old Rose, Golden State, Crimson Monarch and Canary Bird are specially recommended to force as desirable colors for florists for early Spring trade.

To assist in visualizing the true color, we have inserted, parenthetically, Ridgeway's Color Chart descriptions.

We offer all varieties as follows:

Per oz.	Per ¼ lb.	Per lb.
1.50	4.00	15.00

- EXQUISITE—By far the most pleasing of our collection. Truly DAHLIA flowered as regards form and size. Color light rose with center a deep rose. (Tyrian Rose.)
- OLD ROSE—This is adequately described by its name, as it is of the real Old Rose Shade; it is large, and for charm and beauty we consider it ranks next to Exquisite.
- ILLUMINATION—Similar to Exquisite, but a striking self color of deep rose. (Tyrian Rose).
- GOLDEN STATE—A very rich orange yellow (Cadmium). Yellow in the bud, turning to an attractive orange when in full bloom.
- CRIMSON MONARCH—By far the largest and best of the red shades. Flowers often eight inches in diameter. Plants very vigorous. A marvelous production of extraordinary merit.
- GIANT ATTRACTION—A distinct shade of brick red (Spectrum Red) which carries its color well from the bud, and forms into an immense ball of color when in full bloom.

ZINNIAS—Gold Medal Dahlia Flowered—Continued

- SCARLET FLAME—A large, beautiful, bright scarlet, with a delightful blending of orange throughout the petal. This is not a bicolor.
- METEOR—A rich, glowing deep red (Spinel Red) and the darkest of all the red shades. Fine form, with good depth of petal. Very large and more floriferous than other reds.
- LEMON BEAUTY—This is next to Crimson Monarch in size and form. It may be described as a golden yellow on brown. Decidedly a pastel shade, and should be in every collection. (New).
- ORIOLE—We consider this the most beautiful of its class. It is an immense orange and gold bicolor, changing slightly as it ages, but at all times worthy of the beautiful bird for which it is named.
- DREAM—A fine, deep lavender, turning to purple (Mallow Purple) a new, desirable shade in Zinnias.
- PURPLE PRINCE—A fine, deep purple (Rhodanthe Purple) large and well-formed. (New.)
- POLAR BEAR—A very large pure white, the best white yet seen in Zinnias. True Dahlia form.
- BUTTERCUP—An immense deep creamy yellow. A very desirable flower, which should be included in every collection.
- CANARY BIRD—A delicate shade of primrose—very large and holds its color well until out of bloom.

-----SPECIAL GOLD MEDAL MIXTURE—

	Per oz.	Per ¼ lb.	Per lb.
A well blended mixture containing all the above novelties-----	1.25	3.00	10.00

- ALL COLORS MIXED—While this mixture may not contain such a variety of colors as the Special Mixture, its color range is very good; it has been thoroughly rogued in the field for type and size of flower-----

|-----|------|------|
| .85 | 2.00 | 6.00 |
|-----|------|------|

PICOTEE TYPE

The Picotee Zinnia, introduced by us in 1919, differs from other types in that each petal is outlined by a contrasting color which harmonizes with the body of the flower. The form and color range are similar to the Giant type, but the size is between the Giant and Pumila types. They are useful to provide variety in that portion of the garden devoted to Zinnias, but they are especially adapted for use as cut flowers. They reproduce about 70% true.

ZINNIAS—Picotee Type—Continued

	Per $\frac{1}{4}$ lb.	Per lb.
-----Golden Pheasant—Gold ground tipped with maroon-----	3.00	10.00
-----All colors mixed, including new colors from white to scarlet-----	2.50	8.00

QUILLED TYPE

-----Victory Choice Mixed—including several new colors; this variety has been greatly improved in size and range of color this year-----	2.50	8.00
-----Achievement, Mixed-----	2.50	8.00

GIANT MAMMOTH TYPE

or California Giants

The Giant Mammoth Zinnia has smaller centers and more loosely placed petals than the old Giant type, thus presenting a pleasing appearance. The size of the flower has been notably increased over the Giant Plenissima. The petals are decidedly imbricated and the flower from bud to bloom assumes a succession of graceful forms.

This is the type of Zinnia which we introduced last year. It has proven remarkably satisfactory and we are again recommending it this year.

We have added several new colors this year, which should increase its popularity, especially for florists' use.

	Per $\frac{1}{4}$ lb.	Per lb.

 We have devoted fifteen years to the improvement of existing types of Zinnias, and the originating of new and popular types; such as, PICOTEE, VICTORY QUILLED and DAHLIA FLOWERED. The rapidly increasing demand for these improved types will necessitate our planting over three hundred acres this year.

Bodger's Zinnia Seed will assure you satisfaction. The discriminating buyer knows that the best is always the cheapest in the end.

CALENDULA

Double

Bodger's Golden Forcing	2.75	8.00
-------------------------	------	------

The above desirable shade of Calendula is an intermediate between Orange King and Lemon Queen. For Florists' use it is a much more pleasing shade than Lemon Queen. When forced, it has exceptionally long stems and comes true to color. It will, we think, prove valuable to the florist trade.

CARNATION

Chabaud's Giant Double

Our plantings this year were so exceptionally fine that we again lay stress on the importance of listing this type of Carnation. By special selection we have greatly increased the size and otherwise improved this strain. In our judgment it is the best Carnation now on the market, produced from seed. We, therefore, highly recommend it.

Mammoth Early Branching Nice

This variety is now recognized as the most valuable of all Stocks for cutting purposes and the most popular for general use.

If sown early, they come into flower as early as Dwarf Ten Week varieties; the flowers are larger, and the branching habit renders them invaluable for florists.

CONTRACT FOR 1927 CROP

....., 1927

Between JOHN BODGER & SONS CO., Los Angeles, California

And.....

.....

JOHN BODGER & SONS CO. agree to plant sufficient land under normal conditions, ordinarily to produce the amount of seed named hereafter, at prices indicated, and will deliver the seed at nearest terminal point in California as soon as practicable after harvest, seed to be in good merchantable condition, as defined below.

"In good merchantable condition" is understood as meaning seeds properly cleaned for seeding purposes, approximately free from foreign seeds distinguishable by their appearance, and of a germination equal to the fair average germination of the crop of the current year.

We reserve the right to advance any or all prices in this list on orders received after May 1st, 1927.

JOHN BODGER & SONS CO. will accept contracts only as long as the condition of the crops is favorable enough to justify their accepting same. In case of partial or total failure of any or all crops planted, or in case of damage to, or destruction of JOHN BODGER & SONS COMPANY'S seed stocks before planting, or to any seed through fire, accident or other cause beyond seller's control, JOHN BODGER & SONS COMPANY shall be obliged to deliver, if at all, proportional quantities only, and, in any event, JOHN BODGER & SONS COMPANY shall have the right to reserve an amount of seed equal to that used in said planting.

Bags or containers will be charged at market value.

TERMS: F.O.B. California terminal, flower and vegetable seeds, 60 days net or 2 per cent discount for cash within 30 days from date of invoice. Beans, sight draft against bill of lading. All overdue accounts subject to sight draft without further notice.

NON WARRANTY. We give no warranty, express or implied, as to purity, description, quality, productiveness or any other matter of any seeds or bulbs we send out, and we will not be in any way responsible for the crop. We quote subject to immediate acceptance, stocks unsold, confirmation of orders, stenographic errors and omissions, delays and contingencies beyond our control.

If our goods are not accepted on these terms, we should be notified at once.

Our seeds have been selling on their merits for the past thirty-three years, and by observing the steadily increasing demand for them, we believe they have given general satisfaction. We are always glad to receive comments of any kind from our customers, and will give the same our careful attention.
